SHIFTING THE LIMITS

FRONIUS ENERGY PACKAGE

/ The personal storage solution for 24 hours of sun.

/ SnapInverter technology

/ Integrated data communication

/ Dynamic Peak Manager

/ Smart Grid Ready

/ Ready for Storage

/ Multi Flow Technology

/ 24 hours of sun is the Fronius vision of how energy will be supplied in the coming decades. The Fronius Symo Hybrid is the heart of the storage solution for 24 hours of sun - the Fronius Energy Package. Boasting power categories ranging from 3.0 to 5.0 kW, the three-phase inverter allows excess energy from a photovoltaic system to be stored in the Fronius Solar Battery. The result: maximum self-consumption of the available power and maximum energy independence. Excess solar power can thus be used at times when generating conditions are poor or impossible. With the emergency power function, the household can enjoy an optimum electricity supply even during power outages (retrofitting of the emergency power function is possible from mid 2016 using a software update). Perfect system configuration and visualisation are provided by the built-in web server with graphical interface, WLAN and Ethernet. In addition, the DC coupling on the battery guarantees maximum efficiency of the overall system.

FLEXIBLE

- / Emergency power function and battery can be retrofitted
- / Range of storage capacities available (4.5 - 12.0 kWh)
- Retrofittable to existing PV systems

EFFICIENT

- / DC-coupled system
- / No multiple conversions between AC and DC
- / High-performance lithium iron phosphate technology

THREE-PHASE

- / Maximisation of self-consumption
- / Three-phase emergency power supply
- / Grid phase balancing support

REVOLUTIONARY

- / User-friendly interface
- / Integrated WLAN and Ethernet
- / Unlimited usage options thanks to Multi Flow Technology

TECHNICAL DATA FRONIUS SYMO HYBRID

/ The Fronius Symo Hybrid is the heart of the storage solution for 24 hours of sun - the Fronius Energy Package. With power categories from 3.0 to 5.0 kW, the three-phase inverter allows surplus energy from a photovoltaic system to be temporarily stored in the Fronius Solar Battery. The built-in Multi Flow Technology enables the energy flows to be intelligently managed.

Retrofitting of the emergency power function is possible from mid 2016, using a software update.

WE HAVE THREE DIVISIONS AND ONE PASSION: SHIFTING THE LIMITS OF POSSIBILITY.

/ What Günter Fronius started in 1945 in Pettenbach, Austria, has now become a modern day success story. Today, the company has around 3,300 employees worldwide and has been granted more than 900 patents. Our goal has remained constant throughout: to be the innovation leader. We shift the limits of what's possible. While others progress step by step, we innovate in leaps and bounds. The responsible use of our resources forms the basis of our corporate policy.

PERFECT WELDING

/ We develop products and complete systems - both manual and automated - as well as the corresponding services for our customers in the global welding technology market. We have made it our goal to decode the "DNA of the arc".

SOLAR ENERGY

/ The challenge is to make the leap to a regenerative energy supply. Our vision is to use renewable energy to achieve energy independence. With our services, inverters and energy-storage systems for optimising energy yields, we are one of the leading suppliers in the photovoltaics sector.

PERFECT CHARGING

/ As know-how leaders in the world of battery charging, we deliver exceptional solutions to create the maximum benefit for our customers. For the intralogistics sector, we are committed to energy flow optimisation for electric forklift trucks and are constantly striving for the next innovation. Our powerful charging systems for vehicle workshops guarantee safe and reliable processes.
